Singapore Department of Statistics - Written Statement

Singapore notes the importance of data governance and stewardship and places great emphasis on data security, protection and privacy in our statistical work.

5(b) Data governance
in a changing world

Hence, the Singapore DOS has set up a Data Administration Group and an ICT and Digitalisation Steering Committee for setting data governance, systems security and related policies. These committees are chaired by the Chief Statistician and comprise senior management who are the data owners for the data under their purview.
